Services: Supplies information on: donor milk banking, it's safety, clinical uses and how to access it. Publications available from the Human Milk Banking Association of North America Guidelines for the Establishment and Operation of a donor Human Milk Bank \$25 (revised annually). Prepaid orders preferred. Donors are volunteers who are screened for their health history and have negative blood tests for HIV-1 and 2, Syphilis, Hepatitis B and C, HIV P24, HTLV 1 and 2. Blood testing is done by the Milk Bank. Breastmilk is pumped and delivered to the Milk Bank frozen. There it is thawed, cultured, and pasteurized. Recipients are infants or others who have a medical need for breastmilk. It is dispensed only on a physician's prescription. Frozen breastmilk can be delivered anywhere in the USA via overnight air shipping. Handling fees for pasteurized breastmilk range from \$2.00 to \$2.75 per ounce which may be covered by third-party payers, and in special circumstances, by WIC or Medicaid. Call the milk

bank closest to you for additional details about donating or obtaining breastmilk.
